# Director's Message

**Dr. Sanjeev Chaturvedi**  
Director  
GNIOT Institute of Management Studies (GIMS)

We at GNIOT Institute of Management Studies (GIMS), Greater Noida believe in philosophy that the Management Programme is an investment decision that improves the probability of being hired or promoted, provides the necessary professional background and develops the skills needed to excel in a competitive and international environment. In a market as competitive as today's, one of the facts that makes one candidate stand out from another is being in possession of a PGDM from an institution like GNIOT.

The GIMS faculty brings a cutting edge curriculum and learning into the classrooms. This gives our students an exposure to best business practices that are current and global. Additionally, our students learn how to manage people and situations from business leaders through the year and these go a long way in enabling them to put theory to practice and seamlessly assume the mantle of leadership in the future. We at GIMS also understand that a graduate can make the decision to study a Management Programme for two basic reasons: updating their professional concepts or learning basic business management skills. When it comes to upgrading, it is usually the reason why the graduates choose the master's programme; to continue learning and remain competitive in a globalized market. The academic background of those studying for management is highly valued in the business field. It's a future investment, which adds weight to your resume. It must be mentioned, students in these programmes are more likely to gain leadership positions and senior management in companies.

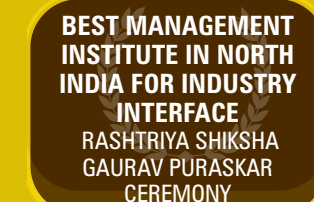

We at GIMS focus on its ability to respond to the goals in a dynamic environment in the most profitable way. This requires that suitable people, with the right combination of knowledge and skills, are in the right place and at the right time to do the necessary work in the best way. At GIMS, we train the students why they are the most valuable resource in any society. Nowadays, companies are investing each day more in their Human Resources, which can define the future and the potential of the company.

Taking everything into account, pursuing PGDM from GIMS leads to the consolidation of a good network of contacts, the gain of new skills and strategic knowledge, the stability and job recognition and the knowledge to start a new company.

I extend my best wishes to 2023-25 Batch. Happy Learning and Excelling.

### Graduation Eligibility criteria

The students of GIMS have the opportunity to take part in a one or two-week long international immersion program. It includes visits to local companies and partner business schools, with time to visit local places of interest. The program represent important opportunities for professional growth, networking and team-working, as all experiences are shared and discussed with fellow students and met with management in the companies visited. It is innovatively designed to bring international exposure to the students with an academic feel. An international exposure of this kind not only expands the vision, but also augments the personality of management students. The refinement is all about a wide variety of people, wonderful places, different mannerisms and opportunities to broaden one's horizons. During the Immersion Program candidates visit companies, discuss strategic issues with managers .It is a great opportunity for the students to gain international experience without heavy personal investment as the immersion program is fully facilitated by the institute. It is as an eye-opening experience that gives them a new perspective on markets, management and culture; a perspective that cannot be gained from a traditional classroom experience. The students get opportunity to meet with senior managers of medium to global sized businesses to discuss where business is going and how they have adapted to the challenges of a globally competitive environment is also invaluable. Global experience is a

required part of the PGDM curriculum today. International Immersion Program at GIMS is designed to give students on-the-ground experience that goes beyond what can be learned in a classroom-widening their thinking and developing knowledge and skills to manage in a globalized economy. Such global study trips provide broad business and cultural exposure of a country to all the participants. The educational trip fulfills the mission of providing experiential learning that enhances classroom instruction. And, one can see two clear benefits. One is the "conceptual" benefit of broadening knowledge of global issues, management, and leadership issues, or of a country or industry. The other is "personal" benefit which revolves around exercising leadership, getting to know other students better, and having a meaningful and fun experience. And, for the students of GIMS, this study tour is often the most unforgettable experience of their lives!
