Summer Internship Statistics:

2021-23

On completion of the first year, all students are required to undergo a Summer Internship Program (SIP) of 8 to 12 weeks duration. This helps them to gain hands-on experience in the application of management concepts and functional skills. For this purpose, IMI has a dedicated window in the academic calendar known as the SIP week. During these seven days the students get an opportunity to apply to relevant companies. This practice of 'Learning by Doing' enables the students to relate the rigor of theory in the world of business. The students work on projects specified by the company in which they undergo SIP. At the end of the summer internship, which is done under the supervision of a company executive and a faculty mentor, students are required to submit a report to the company and to the institute. The concerned company executive provides feedback to the institute on the student's performance. The Summer Internship Program is an essential requirement for the successful completion of the Post-Graduate Diploma at IMI New Delhi.

Student Exchange Program

at IMI, New Delhi

“A ship in a harbor is safe, but that is not what ships are built for”
~ John A. Shedd.

Truer words have never been spoken. We, at IMI New Delhi, believe that for the holistic development of our students, it is vital for them to explore new avenues, and move out of their comfort zones. IMI has consciously fostered academic linkages covering exchange of students and faculty for their curriculum development, institution building, joint research and training. Our institute, through its student exchange program, in the fifth - sixth semester, allows students to study for a term at one of our partner B-schools and avail a once-in-a-lifetime opportunity to interact with students from across the globe which would help them broaden their horizons. Other than the exchange for a semester, students also get an opportunity to go for short duration global immersion programs.

Some of the reputed B-schools which have collaborated with IMI include:
